Object	Data Type	Field Name	API Name
Account	Multiselect picklist	Skills	Skills__c
Contact	Multiselect picklist	Skills	Skills__c

Read the code given below:

Objective: Sync skills from Contact to Account

Code Snippet 1:

```
//set Skills on Account

trigger SetSkillsTrigger on Account (before insert, before update, before delete, after insert, after update, after delete, after undelete) {
   for(Account acc : trigger.old){
      if(acc.Id != null && acc.Skills__c != null) {
         Contact con = [select id, Skills__c
                  from contact
                  where AccountId =: acc.Id
                  LIMIT 1];
         acc.Skills__c = con.Skills__c;
         update acc;
      }
   }
}
```

Code Snippet 2

```
@isTest
public class SetSkillsTest {
   public static testMethod void primaryContactTest(){
      Account acc = new Account();
      acc.Name = 'Test account';
      insert acc;
      Contact con = new Contact();
      con.LastName = 'A1';
```

```
con.AccountId = acc.Id;
con.Skills__c = ‘A;B;’;
insert con;
Contact con1 = new Contact();
con1.LastName = 'A2';
con1.AccountId = acc.Id;
con1.Skills__c = ‘A;C;’;
insert con1;
Contact con2 = new Contact();
con2.LastName = 'A3';
con2.AccountId = acc.Id;
con1.Skills__c = ‘A;B;C;’;
insert con2;

Account acc2 = [select id, Skills__c
        from Account
        where Id =: acc.Id];

System.assertEquals(acc2.Skills__c, con2.Skills__c);

list<Contact> conList = new list<Contact>();
con1.Skills__c = ‘A;’;
con2.Skills__c = ‘C;’;
conList.add(con1);
conList.add(con2);
update conList;

Account acc1 = [select id, Primary_contact__c
        from Account
        where Id =: acc.Id];
```

```
        System.assertEquals(acc1.Skills__c, 'A;C;');

    }
}
```

Q1. Identify and list the issues in the code snippet 1.

Q2. Fix the issues identified in code snippet 1.

Q3. Identify and list the issues in the code snippet 2.

Q4. Fix the issues identified in code snippet 2.
